

Your Link to Commercial Construction Solutions

Allen Consulting Group Inc. consists of individuals that combine over 100 years of field and sales experience in roofing, construction sales and consultation services. Allen Consulting Group is committed to partnering with specification professionals to provide them with field proven, “nuts & bolts” solutions as it pertains to our specialties. We are committed to assisting the professional in providing their clients long term proven technologies while maintaining project dynamics and affordability.

Tom’s early beginnings were ‘hands on’ installations with an eye for value engineering on many construction projects. The 70’s and 80’s were a time of progressive change in the roofing and construction trades that afforded Tom creative opportunity. Tom’s ingenuity at problem solving led to a patented roofing tool that remains an everyday asset on installations today.

In the mid 80’s the opportunity to expand this experience through Representative Sales unfolded and the beginnings of Allen Consulting Group, Inc. was born. Since 1986, the team assembled under Tom has specialized in Product Presentation, Site Consultation, and Business Development. Currently Allen Consulting Group has developed a highly respected Consultation and Representative Agency with expert Associates. Allen Consulting Group is recognized as one of the top 3 representative agencies of Duro-Last Roofing, Inc. for the past 15 years and provides Agency Training and Technical Assistance for all representative groups and contractors in the network.

**Known for their system prefabrication
Duro-Last has expanded your options
for roofing installation methods.
Please look into their versatility on the
following page.**
